

### **Light Curing Gingival Resin barrier, Blue**

Gingiva Shield VLC is light-curing resin based, gingival barrier in syringe packing for isolating gum and neighbouring teeth. After bleaching, it is easily removable from the gum and inter-tooth spaces. It is a safe and effective barrier to protect soft tissues with an impervious seal.

### **Indications**

Protection of gums during the whitening or other dental treatments

### **Product Benefits**

- Light cured resin-based gingival barrier
- Protects soft tissue with impervious seal
- Easily removable after bleaching
- Convenient to apply from the syringe

### **Product Packaging**
